

I started Harbor Services, Inc. with the goal of providing high quality construction projects, on time and on budget utilizing my experience in construction, leadership, and business. Since inception Harbor Services has done just that.

There is no secret to success, just hard work, eternal vigilance, and acute attention to detail. I take exceptional pride in each and every project and always strive to exceed owner expectations.

While navigating nuclear submarines I learned the importance of being exact and maintaining your course, and I have molded Harbor Services infrastructure to maintain those standards.

I am proud of our accomplishments and confident that you will find that Harbor Services is fully qualified and the right choice for any project.
